Investment Philosophy

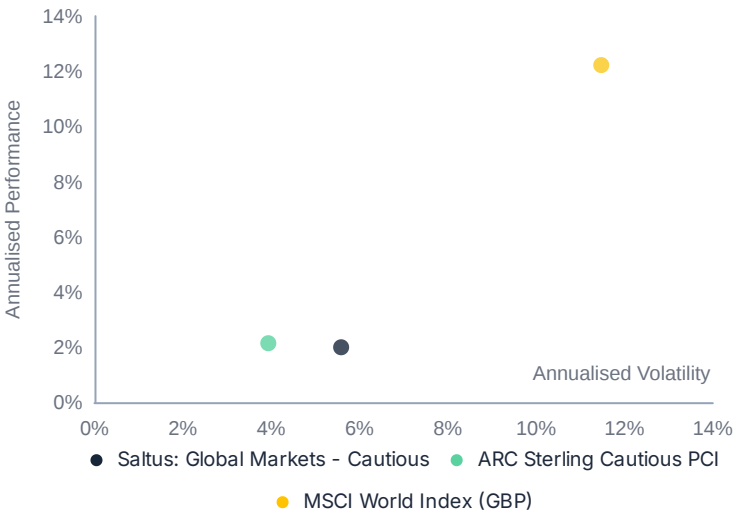

Controlling risk is at the heart of generating consistent returns. Investing should be unconstrained with no bias to any asset class, country, or style. This is so we can capitalise on the broadest set of opportunities. Tilting portfolios based on factor exposure can add value (e.g. value vs growth). Portfolio Tilts are achieved using low-cost index funds which capture specific factors.

Understanding the factors that drive the returns of each asset class and seeking to add value by changing our exposures to such factors, based on our view of the world.
Diversifying widely to reduce exposure to individual risk factors. Keeping portfolio costs as low as possible.
