Investment Philosophy

Controlling risk is at the heart of generating consistent returns.
Investing should be unconstrained with no bias to any asset class, country, or style. This is so we can capitalise on the broadest set of opportunities.
Choosing the most appropriate way to access the opportunity in any asset class, whether that be by partnering with specialists that we consider 'best-in-class', or through investing using an index tracker.
Understanding the factors that drive the returns of each asset class and seeking to add value by changing our exposures to such factors, based on our view of the world.
Working hard to find uncorrelated sources of return – we strive to provide superior diversification and protection than a traditional equity and bond portfolio.
Keeping costs down where appropriate – only partnering with investment managers we believe to justify their fees.
